Statement by NGSA President Skip Horvath Supporting NARUC's New LNG Resolution

"The Natural Gas Supply Association (NGSA) applauds the National Association of Regulatory Utility Commissioners (NARUC) for recognizing the consumer benefits achievable through a more vibrant national infrastructure for liquefied natural gas (LNG)," NGSA President Skip Horvath said today.

"By adopting a resolution today in support of expanding LNG supplies, the state commissioners are sending a signal that they're committed to helping their consumers take full advantage of a global natural gas marketplace," Horvath said. "LNG imports represent an increasingly viable way to help meet the nation's future energy needs at more competitive prices."

"The commissioners recognize, as well, that ongoing technology advancements continue to enhance LNG's already excellent record with regard to both safety and environment."

NGSA represents integrated and independent companies that produce and market natural gas in the United States. NGSA is actively involved in pursuing regulatory and legislative issues that affect the association's members. Established in 1965, NGSA encourages expanded use of natural gas and supports regulatory and legislative actions that foster competitive markets.

NGSA – 003 – 03
