

Peri Ulrey
Director and Chief Economist

Peri Ulrey is the Director and Chief Economist for the Natural Gas Supply Association. She joined NGSA in 1999.

Peri is responsible for preparing quantitative research and analysis that support the association's customer outreach, regulatory filings, legislative hearings, and press releases on issues that stand to impact natural gas producers. Peri also monitors and represents producer interest at the Department of Energy's data collection division, the Energy Information Administration in the collection and dissemination of production, storage, and demand data.

Peri has over 25-years of experience in the energy industry. Prior to joining NGSA, Peri was a Senior Technical Economic Analyst at Potomac Electric Power Company, where she was responsible for conducting economic research and statistical analysis on the effects of demand side and energy use management programs on peak demand and energy sales. She also led the development of transmission and distribution marginal costs and prepared cost of service studies.

Peri served as the 2013 President of the National Capital Area Chapter of the US Association of Energy Economics (NCAC-USAE), a network of more than 400 energy economics professionals in the Washington metropolitan area providing the exchange of ideas in energy economics and energy related issues.

She earned a Bachelor of Science in Economics from George Mason University and a Master of Arts degree in Economics from George Washington University.
