NGSA and CLNG Announce Intended Combination

(Washington, D.C.) -- The Natural Gas Supply Association (NGSA) and the Center for Liquefied Natural Gas (CLNG) today announced their intent to combine.

“Bringing CLNG under the NGSA umbrella will increase the effectiveness of both associations,” said Dena E. Wiggins, president and CEO of NGSA. “CLNG will benefit from the leverage of natural gas suppliers as well as LNG producers, shippers, terminal operators and developers working together toward common LNG goals.

“To date, CLNG’s efforts have resulted in significant progress towards the realization of U.S. LNG exports. LNG exports represent an important future market for our members’ production, and one of NGSA’s strengths is supporting well-functioning markets.”

“CLNG would maintain its mission, brand and identity and have a stronger platform for the Center for Liquefied Natural Gas’s advocacy and education efforts on behalf of the LNG industry,” said CLNG Board Chairman Bruce E. Henderson. “NGSA’s promotion of the benefits of competitive markets and CLNG’s promotion of the important role of LNG in the U.S. economy would be a good fit.”

###

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Established in 1965, NGSA encourages the use of natural gas within a balanced national energy policy, and promotes the benefits of competitive markets, thus encouraging increased supply and the reliable and efficient delivery of natural gas to U.S. customers. For more information, please visit www.ngsa.org and www.naturalgas.org.

Markets Matter: Representing America’s Major Producers and Suppliers of Natural Gas Since 1965

The Center for Liquefied Natural Gas (CLNG) is a trade association of LNG producers, shippers, terminal operators and developers, and energy trade associations. CLNG is a clearinghouse of educational and technical information. It also facilitates rational issue discussion and the development of public policies that support LNG’s contribution toward economic growth in the United States.
