NGSA Statement on EPA Carbon Reduction Rule

(Washington, D.C.) -- Natural Gas Supply Association (NGSA) president and CEO Dena E. Wiggins made the following statement on the Environmental Protection Agency's proposed carbon dioxide reduction rule today.

"Natural gas has an excellent track record in lowering carbon emissions, as we witnessed in 2012 when power plants consumed more natural gas than ever in history and emissions reached a 20-year low. We are proud to play a part in lowering emissions and hope that as the EPA and states design their carbon reduction programs, they will continue to realize the emission benefits provided by the competitive natural gas market."

####

NGSA represents integrated and independent companies that supply natural gas. Established in 1965, NGSA encourages the use of natural gas within a balanced national energy policy, and promotes the benefits of competitive markets to ensure reliable and efficient transportation and delivery of natural gas and to increase the supply of natural gas to U.S. customers.
