NGSA and CLNG Commend Senate for Confirmation of Richard McIntyre and Robert Glick as FERC Commissioners

(Washington, D.C.) -- Dena E. Wiggins, president and CEO of the Natural Gas Supply Association, and Charlie Riedl, Executive Director of the Center for LNG, commended the Senate for its vote today to confirm Kevin McIntyre and Richard Glick to the Federal Energy Regulatory Commission.

Dena Wiggins said:

“We applaud the Senate for its vote today to confirm these two outstanding and experienced individuals and look forward to working with Kevin McIntyre and Richard Glick at the Federal Energy Regulatory Commission. Together they bring a wealth of experience in different regulatory aspects of the energy industry. This vote brings the Commission to full-strength and enables the Commission to move forward with confidence on the important work that lies ahead. “

Charlie Riedl said:

“Today’s Senate vote is welcome news. With these final confirmations by the Senate, FERC now has a full complement of Commissioners to focus on the important work of reviewing LNG export projects quickly and efficiently.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA maintains a deep focus on the regulatory issues that affect natural gas producer-marketers and has been involved in a substantive manner in every one of the Federal Energy Regulatory Commission’s significant natural gas rulemakings since FERC’s creation in 1977. For more information, please visit www.ngsa.org and www.naturalgas.org.

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full value chain, including LNG producers, shippers, terminal operators and developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
