### **NGSA and CLNG Commend Administration on Nominating James Danly to FERC**

(Washington, D.C.) -- Dena E. Wiggins, president and CEO of the Natural Gas Supply Association, and Charlie Riedl, Executive Director of the Center for LNG, commended the administration for nominating James Danly to the Federal Energy Regulatory Commission.

Dena Wiggins said:

“We commend the administration for its decision to nominate James Danly to the Federal Energy Regulatory Commission. With his background as the FERC General Counsel, he understands the important role of competitive markets as well as the critical role of pipeline infrastructure projects in promoting the role of natural gas in a clean energy future. We look forward to his confirmation and also look forward to working with him on the Commission as the Commission tackles the many challenging issues ahead.

Charlie Riedl said:

“As the global LNG market continues to grow and the United States plays a larger and larger role, a well-staffed and educated FERC is essential. This appointment helps provide greater certainty for buyers and sellers of gas and project developers. We look forward to working with Mr. Danly and the other members of FERC to ensure a reliable and predictable LNG process.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA maintains a deep focus on the regulatory issues that affect natural gas producer-marketers and has been involved in a substantive manner in every one of the Federal Energy Regulatory Commission’s significant natural gas rulemakings since FERC’s creation in 1977. For more information, please visit [www.ngsa.org](http://www.ngsa.org).

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full value chain, including LNG producers, shippers, terminal operators and developers, providing it with unique insight into the ways in which the vast potential of this abundant, clean and versatile fuel can be fully realized.
