NGSA-CLNG Joint Statement on 2020 Election

(Washington, D.C.) – The Natural Gas Supply Association (NGSA) and the Center for LNG (CLNG) released the following joint statement today on the 2020 election.

“We congratulate President-elect Biden and look forward to working with him, his Administration and the new Congress to ensure that natural gas continues to be a clean energy leader, helping to reduce overall emissions here and around the world.

“This election elicited historic voter turnout. It also brought attention to the pivotal role of natural gas in the U.S. economy, sustaining jobs and helping to make the United States a world leader in reducing CO2 emissions to 15-year lows. Natural gas has always been a non-partisan fuel, providing affordable and reliable energy to power the economy and keep people warm -- goals that we all agree upon. We are innovating, partnering with renewables and focused on an energy future that is clean and affordable for all and look forward to carrying on that work with the new Administration.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions.

Markets Matter: Representing America's Major Producers and Suppliers of Natural Gas Since 1965

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including all six large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
