### **NGSA and Center for LNG Welcome Incoming Biden Administration**

(Washington, D.C.) – The Natural Gas Supply Association (NGSA) and the Center for LNG (CLNG) released the following joint statement on the inauguration of President-elect Joe Biden tomorrow.

“We congratulate President-elect Biden on his inauguration and wish him success in uniting the country during this extremely challenging time.”

Dena Wiggins, President and CEO of the Natural Gas Supply Association, said:

“NGSA’s members welcome President-elect Biden and the opportunity to show the world that the U.S. natural gas industry is a clean energy leader working to reduce overall emissions here and around the globe. We share President-elect Biden’s support for re-joining the Paris Agreement. We are innovating, partnering with renewables and focused on an energy future that is clean and affordable for all and look forward to carrying on that work with the new Administration.”

Charlie Riedl, Executive Director of the Center for LNG, said:

“The growth of U.S. LNG exports began during the Obama Administration and was continued under the Trump Administration. We are looking forward to working with the Biden Administration to re-introduce them to the pivotal role of U.S. LNG in economic growth here at home, while helping our trading partners around the world to reduce their emissions, improve their air quality and provide reliable energy to people who desperately need it.”

#####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions.

#### ***Markets Matter: Representing America’s Major Producers and Suppliers of Natural Gas Since 1965***

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including all six large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
