### **NGSA and Center for LNG Statement on New U.S. Emissions Goals**

(Washington, D.C.) – The Natural Gas Supply Association (NGSA) and the Center for LNG (CLNG) released the following joint statement on the announcement of new U.S. emissions goals today.

Dena Wiggins, President and CEO of the Natural Gas Supply Association, said:

“We believe that natural gas will play a big part in achieving the ambitious climate goals set forth by the White House today. Natural gas makes clean energy achievable and affordable by partnering with renewables and by replacing high-emissions fuels around the world. We are deeply committed to building a clean energy future for all. We have embraced change and we are already dedicating our best minds and billions of dollars toward clean tech solutions such as carbon capture and hydrogen energy. Natural gas is an essential building block of the clean energy future.”

Charlie Riedl, Executive Director of the Center for LNG, said:

“U.S. LNG is already playing a vital role in helping growing economies around the world to reduce their emissions, improve their air quality and provide reliable energy to people who desperately need it. Furthermore, U.S. LNG exports are supporting renewable deployment across the globe, even further reducing emissions. U.S. LNG is part of the next generation of sustainable energy solutions to reducing emissions.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions.

#### ***Markets Matter: Representing America's Major Producers and Suppliers of Natural Gas Since 1965***

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including all six large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
