NGSA Statement on FERC Votes to Modify Pipeline Certificate and GHG Policies

(Washington, D.C.) – The Natural Gas Supply Association (NGSA) issued the following statement today following the Federal Energy Regulatory Commission’s (FERC) vote to modify its natural gas pipeline certificate and greenhouse gas policies.

Dena Wiggins, President and CEO of NGSA, said:

“The orders approved yesterday represent a major overhaul in the way FERC intends to analyze pipeline certificate applications.

“We are very concerned that these revisions will have an immediate chilling effect on pending and future projects. According to EIA, interstate capacity additions were lower in 2021 than at any time since 2016. This is a disturbing trend that will be exacerbated by these revisions.

“I share the concerns raised at the open Commission meeting that FERC’s actions impinge on the existing statutory framework of the Natural Gas Act and arrogate authority to the Commission that can only be exercised by Congress.”

For more information about NGSA’s journey to the goal of net-zero emissions, please visit [NGSA.org](https://www.ngsa.org)’s [Environment & Climate](#) and [Innovation in Action](#) pages.

#####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions.
