NGSA and Center for LNG Statement on new FERC Acting Chairman Willie Phillips

(Washington, D.C.) – The Natural Gas Supply Association (NGSA) and the Center for LNG (CLNG) released the following joint statement on the announcement that Willie Phillips will assume the acting chairmanship of the Federal Energy Regulatory Commission (FERC).

“We congratulate Willie Phillips on assuming the acting chairmanship of FERC, a role where his experience, thoughtful approach and commitment to the low-carbon energy future will help steer the Commission forward. The natural gas industry is also dedicated to a net zero energy future, with natural gas playing a key role in making that a reality. We look forward to the opportunity to work with him on issues such as infrastructure, reliability, LNG exports and other crucial matters pending before the Commission.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions. For more information, please visit www.ngsa.org.

Markets Matter: Representing America's Major Producers and Suppliers of Natural Gas Since 1965

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant, clean and versatile fuel can be fully realized.
